

Tom VIVIAN

Engineering Student – Mechanical Engineering & Microtechnology

Besançon, France | +33 6 20 21 44 62 | tom.vivian@supmicrotech.fr

[LinkedIn](#) | [Portfolio](#)

INTERNSHIP SOUGHT

20 to 26-week engineering internship (August 2026 – February 2027) in **manufacturing methods, industrialisation or production engineering**. Hands-on, shop-floor oriented. Industry 4.0 focus.

EDUCATION

SUPMICROTECH – *National Engineering Institute of Mechanics and Microtechnologies* – Besançon, France

Master's degree in engineering in Mechanical Engineering – 1st year | 2025 – 2028

- Intended specialisation: Manufacturing Methods (MIND) or Production Systems Engineering (ISP)
- Relevant courses: Production management (MRP/MRP II, scheduling, plant layout), industrial metrology & quality control, ISO/GPS tolerancing, lean manufacturing, sampled-data control, machining processes (milling, turning, plastic injection)

Intensive Preparatory Classes for Engineering Schools – Lycée Victor Hugo, Besançon

Equivalent to a 2-year undergraduate degree in Mathematics & Physics | 2023 – 2025

- A two-year intensive course reading mathematics and physics to gain admission in the top- ranking French engineering schools.

French Baccalaureate with Honours | 2023

Majors: Mathematics, Physics, Computer Science – Options: Advanced Mathematics, English-immersion track

WORK EXPERIENCE

Production Operator (night shift) – Plastigray (plastic injection moulding)

Summer job – 2 weeks | Summer 2025

- Operated and monitored injection moulding presses autonomously on the night shift
- Performed visual quality inspections (flash, frost marks) against client reference samples
- Coordinated with maintenance technicians and logistics to ensure production continuity

Full renovation of apartments (from barn conversion) – Family project

Every other weekend + school holidays | 2021 – 2023

- Involved in all trades: structural work, electrical wiring, flooring, walls and finishing
- Built strong hands-on skills, self-reliance and ability to work in demanding conditions

TECHNICAL & EXTRACURRICULAR PROJECTS

MU Racing Team – Formula Student – SUPMICROTECH

Active member – Organisation & Communication | 2025

- Designed and deployed a complete Notion workspace (folder structure, templates, shared databases) to streamline cross-team collaboration
- Built the team's showcase website for prospective sponsors (HTML/CSS/JavaScript)

Supervised Research Project – CubeSat reaction wheel desaturation

Academic research project (Preparatory Classes) | 2024 – 2025

- Modelled conservation of angular momentum and the interaction between the Earth's magnetic field and onboard magnetorquers
- Developed a Python numerical solver (explicit Euler method) for nonlinear differential equations – Oral examination grade: 15.2/20

SKILLS

Software: Creo (CAD), Python, Matlab, Java, HTML/CSS/JavaScript, Microsoft Office

Languages: French (native), English (Proficient/B2–C1 – Linguaskill scheduled June 2026), Spanish (basic), German (beginner)

Soft skills: Curiosity, autonomy, hands-on mindset, perseverance, teamwork

CERTIFICATION

First Aid & Workplace Safety Certificate (French SST – equivalent to First Aider at Work) | 2026

INTERESTS

Indoor climbing and hiking – Travelling – Programming and AI
